

**3M** Science.  
Applied to Life.™

# The struggle is over.

Finally, over-the-glass protective eyewear that is comfortable and lets you focus on your work instead of uncomfortable eyewear.

**3M™ SecureFit™ 3700 OTG Series**

## Designed with Pressure Diffusion Temple Technology for all day wearability.

### 3M™ SecureFit™ 3700 OTG Series

When wearers of safety glasses speak, we listen. Common complaints include that the protective eyewear scratches prescription lenses and that it is uncomfortable.

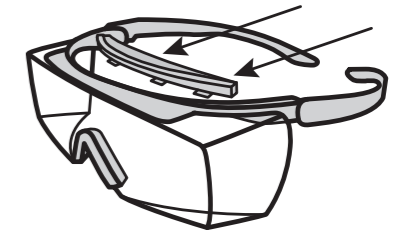

That's why we created the 3M™ SecureFit™ 3700 OTG Series. The adjustable ratchet temples make them easy to adjust for a comfortable and secure fit. Models with the contoured brow guard rest comfortably against the forehead and help provide additional coverage from particles. Best of all, 3M™ Pressure Diffusion Temple Technology is designed to help the glasses feel lightweight and comfortable, yet stay secure while moving.

It's time to protect your prescription eyewear and discover the all-day comfort of the 3M™ SecureFit™ 3700 OTG Series.

**Adjustable Ratchet Temples**  
Multiple position ratchet allows user to adjust lens for facial features and eyeglass position.

**Pressure Diffusion Temple (PDT) Technology**  
3M patented technology that helps diffuse pressure over the ear for a secure, comfortable fit.

**Brow Guard**  
Contoured brow guard rests comfortably against forehead and helps provide additional coverage from particles (selected models).

**Polycarbonate Lenses**

- ▶ Absorb 99.9% of UVA and UVB rays.
- ▶ Meet the requirements of EN166:2001 Standard as an Impact Rated Spectacle.

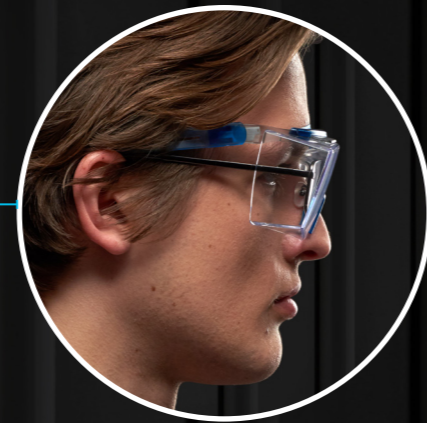

**Choose Your Coating**

- ▶ Scotchgard™ Anti-Fog Coating provides fog and abrasion resistance (selected models).
- ▶ Models with anti-scratch coating also available.

# The fit you want. The protection you need.

Models featuring the brow guard offer users additional coverage from particles. In addition, the brow guard is designed to position the OTG lens further from the face to help accommodate a range of eyeglass positions on the nose.

## IMPORTANT NOTICE

The use of the 3M product described within this document assumes that the user has previous experience of this type of product and that it will be used by a competent professional. Before any use of this product it is recommended to complete some trials to validate the performance of the product within its expected application.

All information and specification details contained within this document are inherent to this specific 3M product and would not be applied to other products or environment. Any action or usage of this product made in violation of this document is at the risk of the user.

Compliance to the information and specification relative to the 3M product contained within this document does not exempt the user from compliance with additional guidelines (safety rules, procedures). Compliance to operational requirements especially in respect to the environment and usage of tools with this product must be observed. The 3M group (which cannot verify or control those elements) would not be held responsible for the consequences of any violation of these rules which remain external to its decision and control.

Warranty conditions for 3M products are determined with the sales contract documents and with the mandatory and applicable clause, excluding any other warranty or compensation.
